DETAILED ACTION

Specification

1. Claims 5 and 6 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim 3. See MPEP § 608.01(n). Accordingly, the claims 5 and 6 are not been further treated on the merits.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

3. Claims 1- 4 are rejected under 35 U.S.C. 102(b) based upon a public use or sale of the invention, Pequet (EP Patent No. 0689 3003).

Regarding to claim1, Pequet teaches the method of relaying data between mobile stations in a cellular wireless communication system which comprises a plurality of mobile stations and a plurality of base stations (see communication system col. 1, lines 1-5, and fig. 1), the method comprising the making of synchronization transmissions from each base station within an area of coverage of the base station (see col. 2 lines 8-20), the synchronization transmissions defining a broadcast control channel for the transmission of broadcast data from the base station to mobile stations within the area of coverage (see col. 2 lines 8-20); receiving the synchronization transmissions at mobile stations within the area of coverage and extracting data therefrom defining the broadcast control channel (see fig. 1 and col. 3, lines 35-53), and at least one calling channel on which mobile stations can transmit probe data to one another, the probe data being

Application/Control Number: 09/730,096

Art Unit: 2684

used by mobile stations to obtain connectivity information relating to the availability of other mobile stations (see fig. 1 and col. 3 lines 35-53, col. 4 lines 42-58, col. 5, lines 1-33 and col. 48-58, col. 7 line 1).

Regarding to claim 2, Pequet teaches wherein the broadcast data transmitted from the base station to the mobile stations contains information identifying the base station and information relating to available capacity at the base station (see abstract lines 3-7 and col. 4, lines 55-col. 5, lines 1-21).

Regarding to claim 3, Pequet teaches wherein the mobile stations utilities the calling channel to broadcast probe signals to other mobile stations, the probe signals from each mobile station including information on the transmission power, local background noise level and path loss to other stations (see col. 5, lines 34-col. 6, lines 1-24).

Regarding to claim 4, Pequet teaches wherein mobile stations receiving probe signals from other mobile stations on the calling channel utility the information therein to generate connectivity data relating to the other mobile stations (see col. 4, lines 48-col. 7, line 1.)

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Meier (U.S. Patent No. 6,407,991) discloses communication network providing wireless and hard-wired dynamic routing.

Application/Control Number: 09/730,096

Art Unit: 2684

Hershey (U.S. Patent No. 5, 481,539) discloses data gram communication service over a cellular telephone network.

Luzzatto (U.S. Patent No. 5,689,802) discloses two-way radio with transmit mode and repeat mode.

5. Any response to this action should be mailed to:

> Commissioner of Patents and Trademarks Washington, D.C. 20231

or faxed to:

(703) 872-9314, (for Technology Center 2600 only)

Hand-delivered responses should be brought to Crystal Park II, 2121 Crystal Drive, Arlington. VA., Sixth Floor (Receptionist).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tan Trinh whose telephone number is (703) 305-5622. The examiner can normally be reached on Monday-Friday from 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nay Maung, can be reached at (703) 308-7745.

Mile Corson

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Technology Center 2600 Customer Service Office whose telephone number is (703) 306-0377.
